

## JIP orbital rotor nozzle

JIP orbital rotor nozzles combine the power of the needle jet with the extensive coverage of the fan jet. The nozzles can be used with all approved high-pressure connections and can also be fitted to lances, spray guns and robots. Thanks to its compact design, JIP nozzles can be used for surface processing and leaning in both building and underground construction.

### Characteristics and advantages

- Multiple higher cleaning capacity levels
- Constant jet flow rate
- Long service life
- Easy to install and disassemble
- Light, durable and reliable
- Good price-performance ratio
- Made in Germany
- Operating pressure: max. 2500 bar
- Operating temp.: max. 100 °C
- Dimensions: 42 x 106 mm
- Weight: 750 g
- Rotor: 0.60 – 2.80 mm

### Applications

- Surface cleaning
- Cleaning and removing the flash from castings
- Removal of surface coatings
- Removing layers of asphalt
- Paint removal
